

Affidavit of John W. Branch

Petition to Revive U.S. Patent App. No 09/574,738 under 37 CFR 1.137(a)

I, John W. Branch, hereby state and declare as follows:

1. I am employed as a patent attorney at the law firm Darby & Darby, P.C. I am authorized to testify as to the information set forth in this Affidavit, including all facts relating specifically to the discovery of abandonment and efforts to revive U.S. Patent Application No. 09/574,738, the rights of which are owned by F5 Networks, Inc. ('F5'). I make the following statements based upon my personal knowledge.
2. On or about June 16, 2005, F5 retained the services of Darby & Darby, P.C., to handle prosecution of U.S. Patent Application 09/547,378. This application serial number, though incorrect, was listed on application transfer material(s) received via email, a copy of which is attached hereto as Exhibit A. These application transfer material(s) include a Notice of Recordation of Assignment document, dated April 22, 2004, a Record of Assignment document, dated September 22, 2003, and an Assignment of Patents document, dated July 23, 2003. Though the Assignment of Patents document correctly lists the title for application number 09/574,738, it unfortunately lists an incorrect application number. i.e., 09/547,738. Both the Notice of Recordation document and the Record of Assignment document list the incorrect application number 09/547,738, instead of the correct application number 09/574,738.
3. Even though Darby & Darby, P.C., received patent application transfer material(s) that listed an incorrect application number (09/547,738 instead of 09/574,738), subsequent care and due diligence was afforded to incorrect application number 09/547,738, as is demonstrated by at least the filing of a new Power of Attorney to Prosecute Applications Before the USPTO document and a Statement under 37 CFR 3.73(b) document, both of which are attached hereto as Exhibit B. This document was submitted to the USPTO on or about June 17, 2005. Though the Statement under 37 CFR 3.73(b) document lists the correct title for the application number 09/574,738, it lists the incorrect application number. i.e., 09/547,738. As a result of the incorrect application number 09/547,738 being listed on the received transfer materials, Exhibit A, the Statement under 37 CFR 3.73(b) document prepared by Darby & Darby, P.C., lists and was directed to an incorrect application number.
4. On October 2, 2007, a Patent Assignment, attached as Exhibit C, was filed with the USPTO for application number 09/574,738, correctly identifying F5 as the assigned owner of the application. This submission included a copy of a redacted Asset Purchase Agreement signed on July 23, 2003, which indicated the rights to the correct application number 09/574,738 as being acquired from uRoam, Inc ('uRoam') by F5. The Asset Purchase Agreement lists the correct application number and title for application number 09/574,738.
5. On October 5, 2007, a Power of Attorney and Correspondence Address Indication Form was filed in application number 09/574,738, indicating Darby & Darby,

Affidavit of John W. Branch

Petition to Revive U.S. Patent App. No 09/574,738 under 37 CFR 1.137(a)

P.C., as appointed by F5 to prosecute this application. A copy of this Power of Attorney and Correspondence Address Indication Form is attached as Exhibit D. The filing of this form corrects the error repeated in previous filings, such as Exhibit B.

6. On October 17, 2007, the status of application number 09/574,738 was first learned by Darby & Darby, P.C., through a phone call with the Office of Initial Patent Examination ('OIPE'). Through this telephone communication, verbal indication was given by the OIPE that the Power of Attorney and Correspondence Address Indication Form, submitted October 5, 2007, had not been processed because the application had gone abandoned. Neither visual confirmation of this status, nor review of a related Notice of Abandonment, was possible at this time because the application had not been scanned into the USPTO Patent Application Information Retrieval system, nor had F5 or its appointed representatives received such notice. The status of application number 09/574,738 was indicated to F5 on October 17, 2007 via email, a copy of which is attached hereto as Exhibit E.
7. On or about January 8, 2008, Darby & Darby, P.C., received copies of the application file for application number 09/574,738 from the law firm Blakely, Sokoloff, Taylor, and Zafman, LLC ('BSTZ'), which was the law firm retained by uRoam to handle prosecution of the application. Included in this application file were copies of a Non-Final Office Action mailed by the USPTO on May 21, 2004, a letter reporting this Office Action from BSTZ to uRoam dated August 17, 2004, and a copy of a Notice of Abandonment mailed December 12, 2004. Copies of these documents are included herewith as Exhibits F, G, and H, respectively. The correspondence addresses on each of these documents refer to either representatives of uRoam or BSTZ, neither of which, at the date associated with each document, reflected F5 as owner of this application.
8. Also included in the application file received by Darby & Darby, P.C., from BSTZ on or about January 8, 2008, was an envelope sent from and returned to BSTZ with a "return to sender" address label. Text on this label indicates that uRoam did not receive correspondence from BSTZ that was mailed on or about August 20, 2004. Attached is a copy of this envelope as Exhibit J. Again, it is noted however, that neither BSTZ nor uRoam, at the mailing or return of this envelope, represented the proper owners of this application.
9. To the best of my knowledge, the data entry error reflected in the received application transfer documents, Exhibit A, is the entire cause of the delay at issue. To the best of my knowledge, this error arrived unexpectedly and through unforeseen fault or imperfection of agencies employed by prior counsel.
10. My reliance on the correctness of the application numbers listed in the application transfer documents, Exhibit A, represents the care and diligence that a prudent and careful person would observe in carrying out his or her most important business. The reliability of the previous counsel, along with the nature and source

Affidavit of John W. Branch

Petition to Revive U.S. Patent App. No 09/574,738 under 37 CFR 1.137(a)

of the error, justified the employment of no additional safeguards to ensure that the data on the application transfer materials had been entered correctly.

11. To the best of my knowledge, proper and timely notifications of changes in correspondence address were submitted to the USPTO for this application. This understanding is validated, for example, by the Power of Attorney to Prosecute Applications Before the USPTO document and Statement under 37 CFR 3.73(b) document, Exhibit B, which were submitted to the USPTO on or about June 17, 2005.
12. I am rectifying this situation under all other conditions of promptness upon discovery of the error. Periods subsequent to the filing of a proper Record of Assignment, Exhibit C, reflect the time during which efforts were continually being made to ascertain the status of the application as well as determine the details and cause of the original error. Such periods include amounts of time needed to collect information and records from a notable number of different parties, as well as obtain the identity and extent of involvement of these parties.

I make these statements under penalty of perjury and hereby swear that the foregoing is true and correct to the best of my recollection.

John Branch, Attorney at Law
Darby & Darby, P.C.

Subject: RE: Your Ref.: 10.095; Our Ref.: 08204/0207446-US0 - Power of Attorney of Signature and copy of Recorded Asset Purchase Agreement

john,

We called the OIPE and they said that while the Power of Attorney does show up in PAIR, it has not been processed because the application is currently abandoned. They referred us to the Art Unit that it is currently assigned (2132) to find out if we need to have the firm with the current Power of Attorney to revive the application first or if they will process our Power of Attorney without that step. We have left the Art Unit a voicemail to call us back. We will keep calling until we hear from them.

DETAILED ACTION

1. Claims 1-7 and 9-35 have been presented for examination.

Drawings

2. The drawings filed on 05/17/2000 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftperson's Patent Drawing Review." Formal drawings with corrections must be made in reply to this Office action. See 37 CFR 1.85(a).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 recites the limitation "server" in line 2. There is insufficient antecedent basis for this limitation in the claim. This rejection can be overcome by deleting "server" in line 2 and replacing with --service--.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2132

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 1, 4, 12, 24, 28, and 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Grantges, Jr. et al., U.S. Patent No. 6,510,464 B1.

As per claims 1 and 34, Grantges, Jr. et al. disclose a method and a computer readable medium, comprising:

receiving a request from a destination computer behind the firewall, the destination computer request demonstrating that the destination computer is available to be accessed (see column 4, lines 55-58; presenting multiple choices for accessing multiple applications; see column 4, lines 9-15; figure 1, items 28₁, 28₂, 28₃, 30₁, 30₂, and 30₃; where the applications reside on destination servers);

receiving a request from a remote browser to access the destination computer (see column 4, lines 33-40; figure 1, items 18, 22, and 34; the user of the client computer enters a

destination URL into a web browser to issue an HTTP request; see column 4, lines 58-60; selecting a particular application);

associating the browser with the destination computer using the browser request and a corresponding destination computer request (see column 4, lines 58-60; displaying a welcome page to the user for the selected application); and

providing communication between the browser and the destination computer, the communication being in the form acceptable to the firewall (see column 4, lines 61-65; figure 18, 22, 20, and 32; providing an efficient mechanism for routing the remote user to the selected application being served by one of the destination servers through the firewall).

As per claim 4, Grantges, Jr. et al. further teach that the browser request is encrypted (see column 5, lines 11-15; figure 1, item 52; a secure connection for the web browser through the Secure Sockets Layer (SSL) protocol);

As per claim 12, Grantges, Jr. et al. also describe that the communication between the browser and the destination computer is provided in a secure manner (see column 5, lines 11-15; figure 1, item 52; a secure connection for the web browser through the Secure Sockets Layer (SSL) protocol).

As per claim 24, Grantges, Jr. et al. disclose a system comprising:

a destination computer issuing requests demonstrating that the destination computer is available to be accessed (see column 4, lines 55-58; presenting multiple choices for accessing

multiple applications; see column 4, lines 9-15; figure 1, items 28₁, 28₂, 28₃, 30₁, 30₂, and 30₃; where the applications reside on destination servers);

a remote browser issuing a browser request to access the destination (see column 4, lines 33-40; figure 1, items 18, 22, and 34; the user of the client computer enters a destination URL into a web browser to issue an HTTP request; see column 4, lines 58-60; selecting a particular application); and

an intermediary service coupled to the browser and the destination computer via a network, receiving the destination request (see column 4, lines 45-60; figure 1, items 34, 52, and 18; presenting the options page to the user through the proxy server) and the browser request (see column 4, lines 33-40; figure 1, items 22 and 34; the web browser issuing an HTTP request across the insecure network through the proxy server), associating the browser with the destination computer using the browser request and a corresponding destination computer request (see column 4, lines 58-60; displaying a welcome page to the user for the selected application); and

providing communication between the browser and the destination computer, the communication being in the form acceptable to the firewall (see column 4, lines 61-65; figure 18, 22, 20, and 32; providing an efficient mechanism for routing the remote user to the selected application being served by one of the destination servers through the firewall).

As per claim 28, Grantges, Jr. et al. also describe that the intermediary service provides secure communication between the browser and the destination computer (see column 5, lines

11-15; figure 1, item 52; a secure connection for the web browser with the proxy server through the Secure Sockets Layer (SSL) protocol).

Allowable Subject Matter

7. Claims 13-19, 21-23, and 35 are allowed.
8. Claims 2, 3, 5-7, 9-11, 25-27, and 29-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
9. Claim 20 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 112, second paragraph, set forth in this Office action.
10. The following is an examiner's statement of reasons for allowance:
11. Claims 13-19 and 21-23; and claim 35 are drawn to a method and a computer readable medium for providing access to a destination computer, respectively. The closest prior art, Grantges, Jr. et al., U.S. Patent No. 6,510,464 B1, discloses a similar method and computer readable medium. However, they neither teach nor suggest sending destination computer requests to an intermediary service at predetermined intervals, demonstrating that the destination computer is available to be accessed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Re: U.S. Patent Application for

COMPUTER BEHIND A FIREWALL
Application No.: 09/574,738
Filed: May 17, 2000
Our Ref. No.: 003829.P009

Dear Mary:

Enclosed for your review is a copy of an Office Action that we received from the U.S. Patent Office in reference to the above-identified patent application. Please note that Claims 13-19, 21-23 and 35 are allowed. Furthermore, Claims 2, 3, 5-7, 9-11, 25-27 and 29-33 would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

From our understanding, you do not wish to pursue this matter any further, which will result in this application abandoning. Should you decide to file a response to the Office Action, the total cost would amount to approximately \$2,500.00.

Please call me once you have finished your review so that we can discuss this matter.

Thank you for your assistance. We look forward to hearing from you.

Very truly yours,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP
